

SUSTAINABLE | ECO-RESPONSIBLE | HIGH-END QUALITY

ÉZÉ+ AGENCY

END-TO-END PROJECT SAMPLE DEVELOPMENT PROCESS

PROJECT CONSULTATION SERVICE

Presentation of the project with the client in order to analyze needs, objectives, budget, and feasibility. This service helps clarify the project vision, assess technical constraints, and define the most suitable development stages.

MEASUREMENT TAKING SERVICE

Measurement and analysis based on an original sample provided by the client. This service includes detailed verification of dimensions, proportions, and construction points of the existing product in order to extract the necessary technical specifications. The collected measurements serve as the foundation for pattern making and sample development, ensuring accurate and faithful reproduction aligned with client expectations.

PRODUCT CREATION

Development of the product concept, silhouette, and key characteristics. This service includes defining the creative direction, design details, and technical elements in order to structure the product before the development phase.

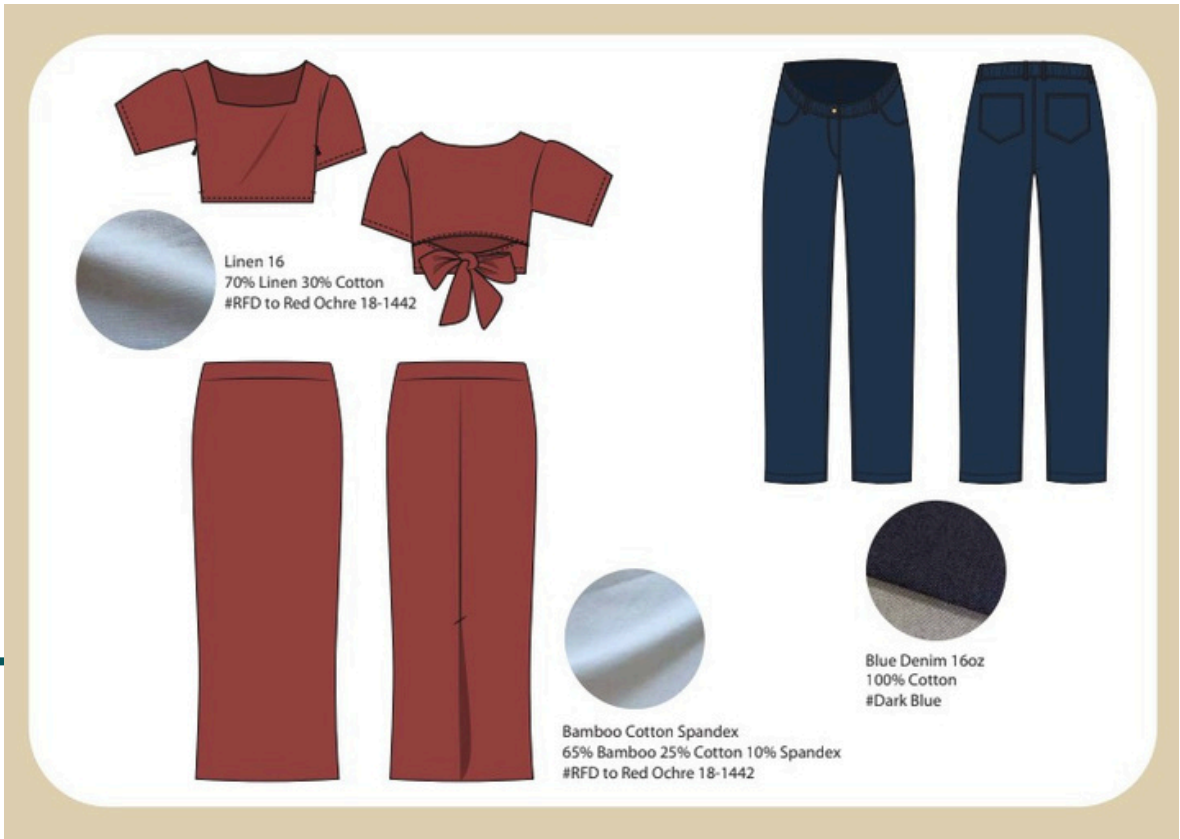

03

TECHNICAL DRAWINGS AND VISUAL REPRESENTATIONS OF THE PRODUCT FOR APPROVAL.

Creation of technical drawings and visual representations of the product, including proportions, construction details, and design elements. This service ensures clear understanding of the product before development and final approval.

TECHNICAL SKETCH SERVICE (TECHNICAL DRAWINGS)

05

FABRIC AND TRIM SOURCING SERVICE

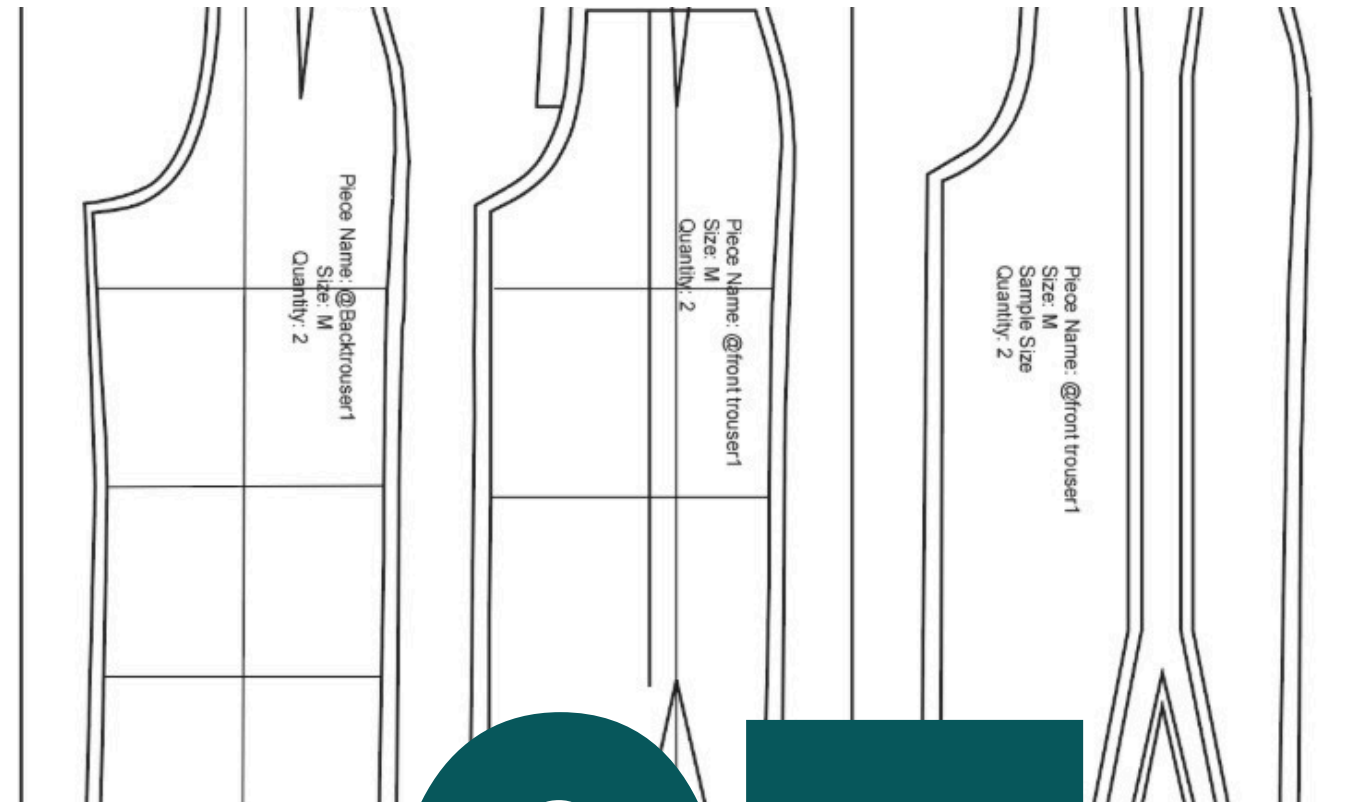

Research, selection, and proposal of suitable fabrics, trims, and accessories for the project. This service includes identifying the best options based on design, quality, budget, and technical requirements to ensure consistency and feasibility of the final product.

PATTERN MAKING SERVICE

Creation of the base pattern according to product specifications by a professional pattern maker. This service translates the design into a technical pattern while respecting proportions, construction, and required development details.

Development of additional sizes from the base pattern to adapt the product to project specifications. This service ensures proportion consistency and design integrity across sizes.

07

GRADING SERVICE

PROTOTYPE DEVELOPMENT SERVICE

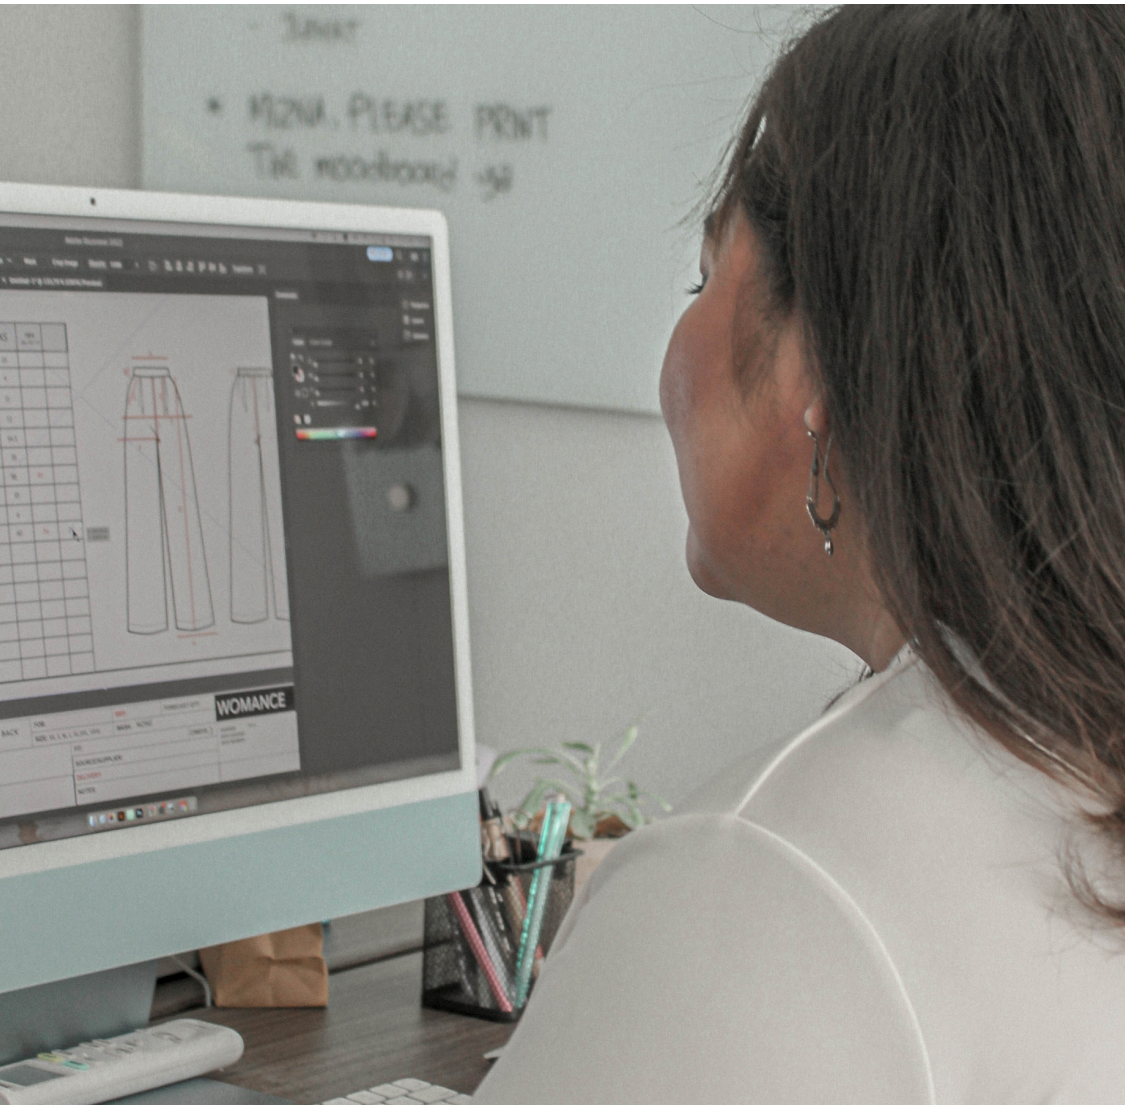

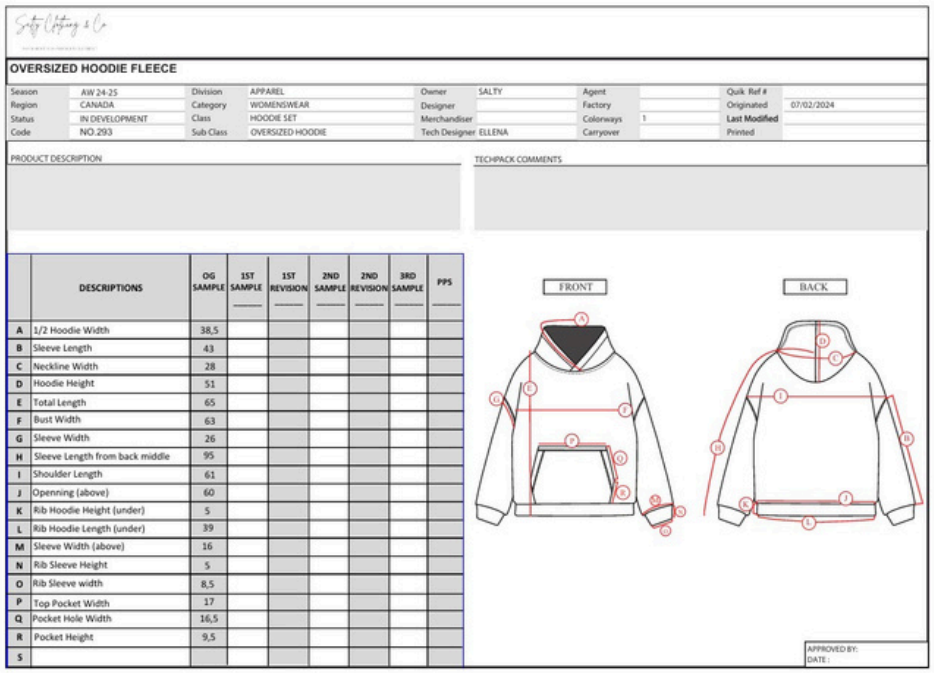

Production of an initial prototype to validate design, construction, and fit. This stage is used to assess technical feasibility and make necessary adjustments before sample production.

08

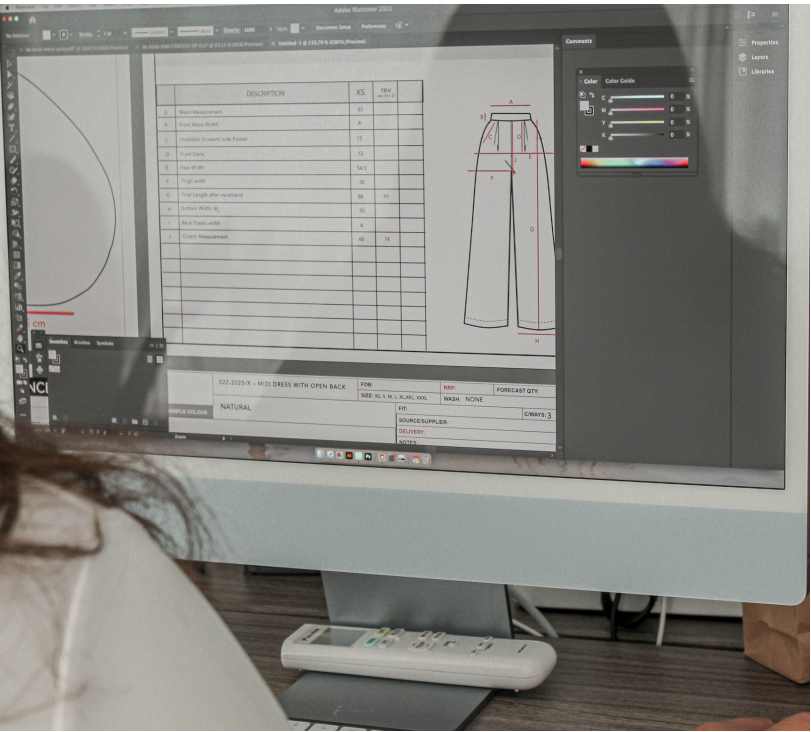

Ézé+Agency

TECH PACK SERVICE (1 SIZE)

Creation of a complete technical file including technical drawings, measurements, construction methods, and product specifications. This document serves as a production guide and ensures clear communication between design and manufacturing teams.

09

MATERIALS & ACCESSORIES

Sourcing of fabrics, trims, labels, and all components required for sample development. This service ensures proper selection and coordination of all elements to meet design and project specifications.

Ézé+ Agency

SAMPLE MANUFACTURING SERVICE

Production of the final sample according to approved technical documentation. This step involves creating a complete product to validate design, construction, materials, and finishing before production.

Ézé+ Agency

QUALITY CONTROL & MEASUREMENT SERVICE

Verification of measurements, garment quality, and compliance with specifications.

12

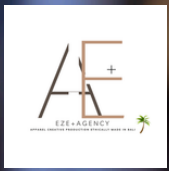

Ézé+ Agency

PROJECT LOGISTICS & COORDINATION

Management of communication, development tracking, supplier coordination, and production team follow-up.

**LOOKING FORWARD TO
COLLABORATING WITH YOU!**
